

North Haven Comprehensive Plan

Soil Suitability for Low Density Development

Legend

- Public Roads
- Private Roads
- Ponds
- Streams
- ocean

SOIL SUITABILITY FOR DEVELOPMENT THAT IS DEPENDENT ON SEPTIC SYSTEMS

- High to very high potential
- Medium
- Low to very low potential
- Not rated

Septic systems are defined as subsurface wastewater disposal systems with the capacity of processing 270 gallons per day of effluent.

The terminology used on this map is defined in text of the Comprehensive Plan.

0 0.5 1 Miles
